There are reports of scarcity, unavailability of Bitcoin, Lack of awareness of the use of Cryptocurrencies in various locations. We need these data. This means you don't have to use your social security or credit score as collateral and allows you to be reasonably pseudonymous. In other words, cryptocurrencies are like virtual accounting systems. They keep a record of all transactions. Summing up, cryptocurrency is a radically new way of paying that makes all the transactions secure and helps to get rid of intermediaries represented by banks, which also contributes to a significant reduction in the commission fee. The most famous cryptocurrency is, of course, Bitcoin, which made everyone curious about the topic of crypto by its explosive rise and has become the de-facto standard for cryptocurrencies.
